

FX Defender Mulcher

The FX26 Defender Forestry Mulcher is the product of years of high-performance brush cutter engineering. It packs a powerful punch in a small package and attaches easily to most compact excavators. It is the perfect tool for property maintenance, to clear a right-of-way or open up a view and to create a defensible space in areas where wildfires are a threat. Like all RockHound equipment, it is durable, dependable and easy to maintain.

Performance

The FX26 Defender Forestry Mulcher is a fixed-tooth cutter that weighs only 850 pounds. It is designed to operate on the standard thumb circuit on all 10,000-pound compact excavators. Its Quadco® QuadTooth System Sawteeth cutter knives have four positions and will make short work of trees up to 8 inches in diameter as well as vines, grasses and other material.

FX26 SPECIFICATIONS

Cutting Width	26"
Overall Width	45"
Weight	850 lbs.
Steel Alloy Cutter	21
Teeth	21
Hydraulic Flow Req	15-40 gpm
Hydraulic Pressure Req	3000 psi
Cutter RPM	1800

BLADE: QT-2000

*QuadTooth is a registered trademark of Quadco Equipment Inc.

Key Features

- **QuadTooth® System Sawteeth***. Easy to change. Four positions, one-piece steel alloy
- **Hydraulic Direct Drive**. Increases efficiency, power and torque; reduces maintenance
- **14-inch Cutter Drum**. 1800 RPM, half-inch thickness
- **Engineered for Compact Excavators**. Only 15 GPM hydraulic flow required
- **Cuts Material Up to 8"**. Grasses, cat tails, vines, trees
